SKILLS

Languages

TypeScript · JavaScript · C# · Kotlin · Python

Web

React · Tailwind CSS · Shopify · Node.js · .NET

Data

Power BI · Power Query · SQL · MSSQL · Excel · SAP data

Mobile

Android Studio · Jetpack Compose

Games & XR

Unity · Unreal Engine · AR · VR · Blender

Desktop & embedded

WPF · Embedded Wizard · Modbus/TCP

Workflow

Git · Azure · Enterprise Architect

EDUCATION

FIM UHK
Information Management, master's degree
2025 – present

FIM UHK
Information Management, Bc.
Thesis: practical project in Unreal Engine
2022 – 2025

SPŠE a VOŠ Pardubice
Secondary school diploma, programming and hardware
2018 – 2022

LANGUAGES

Czech	native
English	B2/C1

Antonín Pecka Bc.

Software Developer

Developer with five years of hands-on work since 2021. I started with desktop applications in C# and WPF, moved on to Android apps in Kotlin, and today I mostly build full-stack web applications in React and TypeScript. At Philip Morris International I worked on data and reporting in Power BI and SQL, including SAP bills of materials and exports to Excel. Alongside work I study Information Management at FIM UHK.

EXPERIENCE

Full-Stack Web Developer — 03/2026 – present
PekneWeby s.r.o.

- Building web applications (React, TypeScript) and connecting them to backends and external services.
- Frontend of the Chalupuj accommodation portal in React, together with a backend developer.
- Working directly with clients, estimating and splitting work in a small team.

Android Developer — 10/2025 – 03/2026
Blendlens

- Developing the Blendscan app in Kotlin (Jetpack Compose) with an Azure backend.

IT Intern – IT Operations & Data Analyst — 02/2025 – 10/2025
Philip Morris International

- Worked with SAP: bills of materials (BOM) and procedures for exporting SAP data to Excel (xlsx) for further processing and reporting.
- Reporting and data analysis in Power BI and SQL for operations teams.
- Supported and coordinated a company-wide IT systems upgrade in a production environment: planning, deployment tracking and user communication.

Freelance Developer (self-employed) — 2022 – present
MADMONQ

- Shopify theme customisation and Node.js services for Discord community automation and management.

Software Engineer — 01/2021 – 12/2023
MIKROKLIMA s.r.o. (part-time during studies)

- User interfaces for embedded devices in Embedded Wizard.
- Modernised a desktop application in WPF (C#) and built tools for Modbus/TCP communication.

AR Applications — 2020 – 2023
Personal projects

- Unity and C#, Blender modelling. AR demos published on GitHub.

SAP & ENTERPRISE SYSTEMS

SAP ERPsim (Manufacturing Extended) – team competition simulating a manufacturing company in SAP. I wrote a custom analytics application for the team that turned simulation data into decision support.

SAP at PMI – bills of materials (BOM) and SAP data exports to xlsx during the internship.

Processes and modelling – Enterprise Architect, information systems analysis and design as part of my studies.
